

# GREAT EYEBROWS DON'T HAPPEN BY CHANCE THEY HAPPEN BY APPOINTMENT

## BEFORE PROCEDURE

- No sun or tanning beds prior to your appointment and two weeks after your appointment.
- Microblading will not be performed if you are pregnant.
- If Botox is performed 3 weeks before and 3 weeks after procedure.
- Do not pluck or wax your brows prior to your appointment.
- Avoid any blood thinning medication prior to your appointment.
- Do not drink any alcohol the night before.
- Limit the amount of caffeine you consume before your appointment.
- Retin A or hyaluronic acid should not be used around the brow area before or after your appointment.

## WHAT TO EXPECT AFTER PROCEDURE

- The area may appear uneven, dry, itchy, tender, red & irritated. This is all 100% normal.
- The area will appear to be darker and bolder in color. This can last up to a few days.
- The healing process takes about 6-8 weeks.

## AFTERCARE

- No Sun Beds.
- No Sweating in the gym.
- No Sauna.
- No Makeup on the brow area.
- No Anti Aging creams on the brow area.
- Do not pick scabs if any appear.
- Do not itch the brow area or pull the scabs away. Let them heal totally for at least 10 days.
- Avoid getting eyebrows wet or soaked in water. Some residual swelling is normal for ALL procedures.
- No bleach, tint or dye the area for one month following your procedure.

DO NOT PICK. These symptoms will dissipate each day and vary on an individual basis.  
Color WILL fade/soften anywhere from 40% to 60%.

At the touch up we will fine tune any area that has faded too much. Healing is specific to each client. It is important to realize that you will need a color boost every year to maintain it's fresh natural appearance. Fading will happen after each procedure. We do not have control over your bodies healing process. You may need to powder and/or pencil even after the healed results. This is an enhancement to your natural brows not a permanent one.
